SUMMARY

Certified Clinical Programmer with 4+ years of experience in clinical trial data programming, specializing in SDTM mapping, safety reporting, and patient profiles for global studies. Proficient in SAS, macro development, CDISC standards, and ADaM datasets, with proven ability to deliver regulatory-compliant outputs in collaboration with cross-functional teams.

Personal portfolio demonstrating R pharmaverse (admiral, sdtm.oak, rtables/tern) and Python-based clinical programming workflows available on GitHub.

TECHNICAL SKILLS

Clinical & Domain Expertise CDISC Standards (SDTM, ADaM), SDTM IG Compliance, Pinnacle 21 Validation, Double-Programming QC, MedDRA & WHO Drug Dictionary Coding, Argus Safety Data, Therapeutic Areas: Oncology, Vaccines, Cardiovascular, Diabetes.

Clinical Programming & Statistical Analysis

SAS: Base SAS, SAS Macros Programming, PROC SQL, SAS/ACCESS, ODS Reporting (RTF, PDF, HTML)

R Programming (Pharmaverse Pipelines): SDTM domain derivation using {sdm.oak}, ADaM dataset creation using {admiral}, TEAE Tables/Listings/Graphs using {rtables} and {tern}, R package development (devtools, roxygen2, testthat, vignettes, R CMD check, CDISC pilot-check validation), PROC COMPARE-style dataset QC ({classiccompare}), survival analysis (survival package), data manipulation using dplyr and tidyr, data visualization using ggplot2, reproducible project structures (here package)

Python: FastAPI development for clinical data services (AE filtering, subject risk scoring endpoints), LangChain agent development for schema-routed clinical query handling, Pandas and NumPy for data ingestion, validation checks, and data manipulation for clinical datasets

Clinical Reporting & Data Visualization

R Shiny: Interactive AE safety monitoring dashboards on ADaM data (SOC/PT incidence, listings, reactive filtering)

Power BI: Interactive dashboard development, data modelling, DAX calculations, Power Query, data transformation and visualization, KPI reporting, ETL concepts, integration with Excel and SQL data sources

Databases & Technical Tools

Oracle SQL: Data extraction, querying, and validation

Other Tools: Git & GitHub (version control, reproducible portfolio projects), GitHub Actions (CI), HTML/PDF reporting, Linux commands, WinSCP.

WORK EXPERIENCE

Clinical SAS Programmer | Infosys Limited (Client – Pfizer US)

Feb 2024-March 2026

- Led end-to-end generation of 2,000+ patient profiles and safety narratives, integrating demographics, exposure, medical history, concomitant medications, laboratory data, and structured adverse event listings using SAS Macros.
- Designed and generated CSR-ready patient profiles across multiple studies and phases, reducing manual review effort by ~70% and accelerating medical review timelines.
- Worked with SDTM and ADaM datasets (ADSL, ADAE) across 15+ studies, supporting downstream analysis activities for integration of Argus safety data with clinical trial data for safety reporting.
- Developed sponsor-compliant safety narratives for AESI, TEAE, and laboratory abnormalities, achieving ~95–98% acceptance based on sponsor's review.
- Collaborated cross-functionally with Data Management and Biostatistics to streamline programming workflows and ensure consistency and quality across deliverables.

Clinical SAS Programmer | Tata Consultancy Services (Client – Viatris Switzerland)

Sep 2021-Sep 2022

- Developed and validated SDTM domains (e.g., DM, AE, LB, EX) in compliance with CDISC standards across multiple Phase II/III clinical studies, ensuring submission-ready datasets.
- Designed and optimized SAS macros aligned with CDISC standards to automate dataset creation and streamline workflows by 30%.

- Collaborated with data management teams to ensure precise mapping of case report form (CRF) data into SDTM domains.
- Performed dataset validation using Pinnacle 21 and addressing compliance findings and ensuring datasets met FDA/EMA submission requirements maintaining ~95% on-time delivery.

SAS Programmer | Wipro Limited

March 2021-Sep 2021

- Worked as SAS/Power-BI programmer to generate reports and dashboards.
- Extracted data from different servers to generate high-quality reports and presentations in different formats using the SAS ODS facility.
- Developed basic interactive dashboards using Power BI and supported data visualization using DAX, Power Query, and SAS-generated datasets for reporting purposes

Clinical SAS Programmer Intern | Signetsoft

Sep 2020-Feb 2021

- Developed strong understanding of CDISC standards and Controlled Terminology for clinical data standardization.
- Applied data management techniques including merging, concatenating, and reshaping datasets using PROC TRANSPOSE.
- Interpreted and worked with annotated CRFs, study protocols, and SDTM Implementation Guide (SDTM IG) to ensure accurate dataset mapping.
- Acquired practical knowledge of SDTM domains (DM, CM, AE, MH) and ADaM datasets (e.g., ADSL), supporting regulatory-compliant dataset creation.

Microbiologist at Haldiram Foods International Pvt. Ltd & Heineken N.V.

Sep 2016-Aug 2020

PERSONAL PROJECTS — CLINICAL PROGRAMMING PORTFOLIO

github.com/sharangnimonkar/clinical-programming-portfolio

- Built SDTM domains ({sdtm.oak}) and ADaM datasets with SDTM-to-ADaM traceability ({admiral}), extending CDISC skills beyond SAS.
- Generated AE summary tables, patient listings, and safety plots ({rtables}/{tern}) with HTML/PDF output.
- Built Python clinical data workflows and a LangChain AI agent for schema-routed clinical query handling.
- Built {descriptiveStats} and {classiccompare} R packages (roxygen2, testthat, R CMD check clean, GitHub Actions CI);
- Built an R Shiny AE safety dashboard on pharmaverseadam ADaM data: SOC/PT incidence, AE listings, subject timelines, filters by arm, severity, and TEAE status.

EDUCATION

MS in Diagnostics and Precision Medicine, Dublin City University

2022 – 2023

Relevant Modules : Biostatistics using R programming, Precision Medicine for Oncology and Genetic Disorders, Translational Bioinformatics

Thesis Project : Effect of vemurafenib on melanoma cell lines SK-MEL-2 and HT-144

Post-Graduate Diploma in Clinical Research and Data Management, Cliniminds Mumbai

2020 – 2021

Relevant Modules : Principles of ICH-GCP, 21 CFR Part 11 & HIPAA, Study Design and Protocol Development, Ethics and Regulatory Compliance, IRB, Informed Consent, Clinical Trial Monitoring and Adverse Event Reporting, Auditing and Quality Control, Clinical Site Management, Drug Accountability

MS in Microbiology, Nagpur University

2014 – 2016

Relevant Modules : Molecular Biology and Genetics, Recombinant DNA Technology, Bioinformatics

CERTIFICATIONS

SAS Certified Specialist: Base Programming Using SAS 9.4 (Score : 912/1000)

Data Science with Real World Data in Pharma, Genentech (Roche)

Hands-On Clinical Reporting Using R, Genentech (Roche)

Data Visualization & Dashboarding with R Specialization, Johns Hopkins University

Clinical Trials: Good Clinical Practice, Novartis

Generative AI for Healthcare, Google Cloud

ACHIEVEMENTS & AWARDS

- Achieved timely delivery of project deliverables, earning recognition in the form of **TCS Gem Award** from manager.
- Awarded **Infosys Star Award** for outstanding performance and high-quality delivery in clinical programming and safety reporting.
